

What does a typical home inspection cover?

- External conditions and surfaces.
- Foundations, slabs, and floors.
- Roof, attic, ventilation and Insulation.
- Walls and ceilings.
- Plumbing and electrical Systems.
- Garage, driveway and walkways.
- Appliances
- Heating and cooling systems.

Our home inspection philosophy is to deliver a highly detailed report to the ASHI Standards (American Society of Home Inspectors) and to include many photos to make the report easy to understand. Reports are delivered digitally within 24-48 Hours. Our service area is Harrisburg, York, Lancaster (one hour radius of Harrisburg) Enviroquest currently has three inspectors to better serve you. No weekend upcharge.

Radon Testing and Mitigation

Radon is considered the second leading cause of lung cancer in the United States.

The EPA recommends that all homes be tested. Homes with

Radon levels greater than 4.0 picoCuries per liter (pCi/L) should be fixed (mitigated). We offer free estimates and guaranteed results.

Water Testing

Many mortgage lending institutions require that private wells be tested for potability (coliform bacteria).

Some other loan programs such as FHA and VA have their own unique testing requirements.

Mold Testing

Construction techniques implemented over the last 30 years are conducive to the growths of molds and fungi. Some of these organisms can cause serious health problems.

Comprehensive testing can give you the information you need to assess the seriousness of a mold infestation.

Wood Destroying Insect Inspections

Many lending institutions require a wood destroying insect inspection prior to purchase.

Commercial Property Inspections

Perform commercial property inspections.

Passive House

We are certified passive house consultants and builders.

Kirk Rogers
ASHI # 257111

Benefits of an Enviroquest home inspection:

- We deliver a detailed report that is easy to read with multiple photos.
- We point out major and minor deficiencies to give you a complete picture of your new home's condition.
- We identify major expenditures coming up so you can budget for these potential expenditures.
- We show you how the various systems work.
- We review and explain the conditions found.
